Jayant Pratap Singh

AI-Native Full Stack Developer

Delhi, India | +91 7819016236 | ranajayant527@gmail.com | GitHub | LinkedIn

Summary

Backend-focused Full Stack Developer experienced in building REST APIs, database-driven applications, and event-driven systems. Proficient in Node.js, TypeScript, PostgreSQL, and backend architecture. Experienced in using AI coding assistants to accelerate implementation, explore codebases, debug issues, and improve development workflows while maintaining code quality and understanding system design.

Experience

Full Stack Developer October 2025 – Present
Nirnaya (Ministry of Defence) *New Delhi, India*

- Built **secure internal web platforms** that digitize **operational workflows**, replacing manual processes with role-based dashboards for **real-time visibility** into daily operations.
- Designed and shipped **scalable REST APIs** and normalized **database schemas** for **secure data exchange** between modules, with **query optimization** to keep dashboards fast under load.
- Used **AI coding assistants** to speed up delivery, debug faster, and explore unfamiliar codebases; reviewed every output for **correctness, quality, and security** before merging.

Full Stack Developer August 2025 – October 2025
UPSALA DEFSOL *New Delhi, India*

- Built **modular full-stack web applications** with reusable components and clean separation between frontend, API, and data layers.
- Designed **REST APIs** with full **CRUD** operations, **authentication**, **authorization**, and **RBAC** to control access by user role.
- Debugged production issues, fixed **backend integration** problems, and improved **application reliability** through better error handling.

Projects

Zapier – Automation Platform | *Next.js, Node.js, Express.js, PostgreSQL, Kafka, Prisma*

- Built a **workflow automation platform** for creating **trigger-action workflows** across services.
- Implemented **event-driven processing** with **Kafka**, **webhooks**, and the **Outbox Pattern** for reliable execution.
- Developed separate **microservices** for API management, webhook ingestion, event processing, and action execution.

DocEngine – Distributed Document Processing Platform | *Java 21, Spring Boot, PostgreSQL, AWS, Docker*

- Developed an **asynchronous document-processing platform** that converts uploaded **CSV files into PDFs** using background workers.
- Implemented **RabbitMQ**-based job processing, **idempotency**, and **worker recovery** for asynchronous execution.
- **Containerized** and deployed using **Docker** and **AWS**, with **Prometheus** and **Grafana** for monitoring.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Tailwind CSS, ShadCN UI, React Router, Context API
Backend & APIs: Node.js, Express.js, REST APIs, Webhooks, Authentication, Authorization
Databases: PostgreSQL, MongoDB, MySQL
Security & Deployment: OWASP ZAP, Burp Suite, Nmap, Microsoft IIS, HTTPS, SSL/TLS, Vercel, Netlify
AI Engineering: AI Agents, Generative AI, Prompt Engineering, AI Workflows, Context Engineering
Developer Tools: Git, Postman, VS Code, Docker

Education

College of Engineering Roorkee 2021 – 2025
Bachelor of Technology in Information Technology *Roorkee, India*

Certifications & Achievements

- Completed the **Full Stack Developer Course** – 100xDevs.
- Completed the **IBM Full-Stack JavaScript Developer Professional Certificate** – Coursera.
- Completed the **Advanced Artificial Intelligence and Machine Learning** course – Koenig Solutions.
