SUMMARY

Full Stack Engineer focused on building secure and scalable applications with strong backend architecture, API development, and database design. Experienced in React.js, Next.js, Node.js, Express.js, TypeScript, PostgreSQL, MongoDB, application security, and production deployment. Interested in AI-native products, automation, intelligent workflows, and reliable software systems.

EXPERIENCE

Full Stack Engineer

October 2025 – Present

Nirnaya (Ministry of Defence)

New Delhi, India

- Built secure internal web platforms using Next.js, React.js, Node.js, PostgreSQL, and Tailwind CSS.
- Built scalable APIs and defense-grade dashboards for secure operational workflows.
- Managed IIS deployments and optimized backend systems for mission-critical applications.

Full Stack Developer

August 2025 – October 2025

UPSALA DEFSOL

New Delhi, India

- Developed modular full-stack applications using React.js, Node.js, Express.js, and MongoDB.
- Designed REST APIs and implemented CRUD operations, authentication, authorization, and RBAC.
- Troubleshoot application issues, improved system reliability, and collaborated with teams to deliver software solutions.

PROJECTS

NOVO | *Next.js, TypeScript, Node.js, PostgreSQL, AI Workflows*

- Built an owner-controlled AI-native personal operating system with a backend-authoritative control center.
- Designed workflows for managing personal context, automation, tools, permissions, and AI-assisted operations.
- Developed a scalable Next.js interface structured for desktop-assistant and intelligent workflow integrations.

Rabbit | *React.js, Node.js, Express.js, MongoDB, JWT, PayPal*

- Built a e-commerce platform with product discovery, filtering, search, cart management, and checkout workflows.
- Developed admin functionality for managing products, users, orders, and inventory.
- Implemented JWT authentication, role-based access control, PayPal payments, email notifications, and guest-to-user cart merging.
